SUMMARY:

MEAN stack software developer with expertise in front-end and back-end development

TECHNICAL SKILLS:

- **Frontend -** JavaScript, Angular, Typescript, Bootstrap
- **Backend –** Node.js, Express.js
- **Database –** MongoDB

EXPERIENCE:

Mean Stack Developer – SCRIPT ONE | OCT 2022 – Present

- Built exceptional user experiences (UX) with Angular
- Secured applications with robust authentication and authorization
- Optimized database performance and security

Node.js Developer – OTOBUCKS | JAN 2022 to JUL 2022 – UAE | Remote

- Crafted high-performance Data-Fetching APIs with Node.js
- Ensured API quality through rigorous testing
- Spearheaded database setup and connection

Junior MEAN Stack Developer – PNY | JAN 2021 to DEC 2021 | On-Site

- Delivered dynamic web applications
- Designed and implemented efficient APIs for seamless data flow
- Built user experiences with Angular

PROJECTS:

[Link] **Real Time Chat App-** Front End and Back End Development

Tech Stack: Angular, Node Js, Express JS, BootStrap, MongoDB, Typescript

- **Seamless User Interface:** Built with Angular and Bootstrap, offering a responsive and intuitive experience across devices.
- **Real-Time Communication:** Leverages Web Sockets (Socket.io) for instant message delivery and group chat activity updates.
- **Group Chat Functionality:** Users can create and join groups for collaborative communication and discussions.
- **Secure User Authentication:** Utilizes JWT (JSON Web Token) for secure user onboarding, login, and access control.

[Link] **Ecommerce Website-** Front End and Back End Development

Tech Stack: Angular, Node Js, Express JS, BootStrap, MongoDB

- **Engaging UI with Angular & Bootstrap:** Leverages Angular's framework and Bootstrap's components to create an interactive, intuitive, and responsive user interface across devices.
- **Robust Backend with Node.js & Express.js:** Utilizes Node.js and Express.js to handle API integrations for seamless product browsing, user interaction, and payment processing.
- **Scalable MongoDB Database:** Employs MongoDB's NoSQL capabilities to efficiently store and manage product information, user data, and transactions.
- **Secure User Authentication & Authorization:** Implements JWT (JSON Web Token) for secure user authentication and authorization, ensuring data protection and access control.

EDUCATION:

GC University, Faisalabad | BS (Hons) in Information Technology | 2016 - 2020
